# ACCESSORIES

DRASH accessories, options and spare parts are available to enhance every mission capability. Installation of any DRASH accessory is quick and easy. You can do it yourself, or you can contact a DRASH field representative for onsite support. All DRASH accessories come with a guaranteed five-year warranty for parts and service. Extended support contracts for periodic maintenance, refresher training and field support for deployments and exercises are also available.

## DRASH ACCESSORIES INCLUDE THE FOLLOWING ITEMS:

### Connectors:

Provide light-tight connections between DRASH S, XB, M Series or J Shelters.

### Curtains:

Divide shelters into light-tight vestibule areas, provide private and semi-private work areas, and include sound absorbing properties.

### Subfloor Cushion/Insulator:

Provides a protective barrier between the shelter floor and the elements.

### Electrical Systems:

Includes all lighting and wiring systems designed to fit a specific shelter or complex of shelters.

### Extreme Weather Kit:

Used when deployed to climates where heavy snow is expected.

### Keeper Replacement Kits:

Used to replace shelter covers during routine maintenance procedures.

### Plenum:

Used inside shelters to evenly distribute cool or heated air.

### Stake Sets:

Used to secure shelters after set up.

### Shelter Spare Parts Kit:

Contains all of the components and tools necessary to carry out field repairs or replace parts.

### Trailer Spare Parts Deployment Packages:

Complete spare parts deployment packages for DRASH UST Trailers.

### Vinyl Strip Door:

Helps maintain interior climate control during continual ingress/egress of DRASH S, XB, M Series or J Shelters.

### Vinyl Windows:

Used when heating or cooling is required.

## CONNECTOR SETS

NSNs available depending on product and shelter series.

DRASH connectors provide a weather and light-tight connection between two same or different series shelters. The Universal Shelter Connector allows for the interconnection of DRASH Series Shelters. The XBI Connector allows for end-to-end or side-to-side connecting of the Large J Shelters to each other. The 1XBTJ Connector connects to the end of a J Shelter and allows an S, XB or M Series Shelter or Shelters to connect to the J at the ends.

## CURTAINS

NSNs available depending on product and shelter series.

DRASH Privacy Curtains, Divider Curtains, Security/Sound Curtains and Vestibule Curtains divide shelters into compartments. The Privacy Curtain allows the interior of the shelter to be divided into semi-private areas with a room for a corridor. The Divider Curtain divides the shelter into full width compartments. The Security/Sound Curtain is manufactured from sound absorbing material for maximum privacy. The Vestibule Curtain provides a vestibule area for ingress/egress of the S, XB and M Series Shelters.

## SUBFLOOR CUSHION/INSULATOR

NSNs available depending on shelter series.

A lightweight and tight knit 3/16" olefin mesh that provides: (1) An insulating cushion between the ground cover and top floor when deployed in cold climates and; (2) A protective barrier when deployed on rocky and rough terrain. Available for all S, XB and M Series Shelters.

## ELECTRICAL SYSTEMS

*Includes all light and wiring systems designed to fit a specific shelter or complex of shelters: Both U.S. (110VAC/60Hz) and European (220/50Hz) systems available.*

### Small, Medium and Large Wiring Packages

NSNs: 8340-01-514-0048 (small), 8340-01-514-0050 (med), 8340-01-514-0051 (lg)

Cabling, GFI, and multiplex outlet boxes to fit each DRASH Shelter.

### Fluorescent Light Bulb Sets

NSNs: 8340-01-467-9027 (2-bulb set), 8340-01-467-9023 (4-bulb set)

Available in either four-bulb or two-bulb sets. Illuminates the equivalent of a 100 watt incandescent light but uses only 40 watts. Designed for use in S, XB and M Series Shelter, but can also be used in the J Shelter in lieu of metal halide lights (eight to ten fluorescent lights required for a J).

### J Series Metal Halide 4 Light Set

NSN: 8340-01-491-3479

Recommended for the J Maintenance Shelter, this light set includes cabling and four metal halide lights.

## EXTREME WEATHER KIT

NSNs pending.

Used as an optional accessory when deployed to climates where heavy snow is expected and when the S, XB and M Series Shelters will not be heated or unattended for extended periods.

## KEEPER REPLACEMENT KITS

NSNs pending.

Used when replacing interior or exterior shelter covers during routine maintenance procedures. Interior keepers available in white. Exterior keepers available in green or tan.

## PLENUM

Made from durable Ripstop Nylon, DRASH Plenums are used inside S, XB, M and J Series Shelters to evenly distribute cooled or heated air.

### Single Plenum

NSNs available depending on shelter series and model.

The Single Plenum is available in two sizes. The 12 inch diameter version is used for S, XB and M Series Shelters, while the 16 inch diameter version is used for the J Shelter.

### System Plenum

NSNs available depending on shelter series and model.

The System Plenum is used to enhance the flow of air around corners between connected S, XB or M Series Shelters. It includes three single plenums connected with two flexible tubes and two booster fans to accelerate air movement.

## STAKE SETS

NSNs available depending on type of stake set.

Used to secure the shelters after set up, DRASH stake sets are available either as straight 18 inch clear shaft stake pins, 30 inch rebar (barbed) steel shaft stake pins or as 24 inch wood stakes. The straight steel pin set comes with 25 stake pins and is used primarily with S, XB and M Series Shelters. The rebar steel pin set includes 24 stake pins and is used primarily with the J Shelters. The wood stake set comes with 12 stakes. All stake sets come complete with mallet, pins and bag.

## SHELTER SPARE PARTS KIT

NSNs available depending on shelter series.

A complete field spare parts maintenance kit. Contains all the components and tools necessary to carry out field repairs or replacement of parts. Available for S, XB, M Series and J Shelters.

## TRAILER SPARE PARTS DEPLOYMENT PACKAGES

NSNs available depending on trailer series.

Complete spare parts deployment packages for DRASH UST Trailers. Contains all the components and tools necessary to carry out field repairs or replacement parts. Available for various combinations of engines and ECUs.

## VINYL STRIP DOOR

NSN: 8340-01-467-8969 (Green); Pending (Tan).

Clear, heavy-duty, plastic strip door that helps maintain interior climate control during continual ingress/egress of the S, XB, M or J Series Shelters.

## VINYL WINDOWS

NSNs available depending on shelter series.

Covers mesh screen windows that are built into the shelters. Used when ambient light is desired and heating or cooling is required. Comes in individual sets to meet window requirements of each S, XB, M and J Shelter model.
